

## Internet Grandma at Medford Multicare Center for Living

Our 97 year old resident, Anna Mattausch, was assisted by Dan Monahan from our Social Work Department on Wednesday, August 21, 2009 to create an e-mail account and use the Internet for the first time.

Anna is the mother of one son and is expecting a great-grandchild very shortly. She e-mailed her granddaughter and will be checking her e-mail at Medford's new Internet Cafe every Wednesday.

Although hesitant at first, Anna noted, "That was so much fun, I didn't think I would like it as much as I did".

At Medford we strive to provide our residents with positive experiences and engaging activities.

The Internet Cafe is available to all residents and patients at Medford Multicare Center for Living.
